## Section B: Course information

<b>1. Nomenclature</b> <i>Standard 1 AQTF Standards for Accredited Courses</i>	
<b>1.1. Name of the qualification</b>	Course in First Aid Management of Anaphylaxis
<b>1.2. Nominal duration of the course</b>	4 hours
<b>2. Vocational or educational outcomes</b> <i>Standard 1 AQTF Standards for Accredited Courses</i>	
<b>2.1. Purpose of the course</b>	<p>Graduates of the 22300VIC Course in First Aid Management of Anaphylaxis will be able to:</p> <ul style="list-style-type: none"> <li>• Identify the triggers, signs and symptoms of allergic reactions, including anaphylaxis.</li> <li>• Develop risk management and risk minimisation strategies for anaphylaxis. This includes the development and implementation of pre-emergency risk assessment/management and the development of individual anaphylaxis management plans.</li> <li>• Provide an emergency first aid response to an individual experiencing anaphylaxis, until the arrival of medical assistance. This includes standard first aid procedures and the specific skills and knowledge to administer adrenaline using an adrenaline autoinjector.</li> </ul>
<b>3. Development of the course</b> <i>Standards 1 and 2 AQTF Standards for Accredited Courses</i>	
<b>3.1. Industry / enterprise/ community needs</b>	<p>This course was initially developed and accredited in 2005 in response to an identified need by key Victorian first aid providers, such as St John Ambulance and Australian Red Cross. There is a need for first aiders to treat with the administration of adrenaline to casualties who have access to an adrenaline autoinjector as part of their individual Australasian Society of Clinical Immunology and Allergy (ASCI) Action Plan for Anaphylaxis, in the event of a casualty having a severe allergic reaction. The training is in response to the increasing number of individuals in the population with the potential to experience anaphylaxis.</p> <p>This course provides nationally recognised training for workers, or nominated workplace first aiders, from any industry sector and addresses the provision of care to adults and/or children in the workplace who are diagnosed as being at risk of anaphylaxis, or</p>

displaying signs/symptoms of anaphylaxis.

In Australia, there is an increasing number of children and adults being diagnosed with life threatening allergies. In children, food allergy is the most common cause of anaphylaxis triggering over 80% of paediatric anaphylaxis presentations. For older adults, medications are the most common cause, contributing to 57% per cent of all deaths due to anaphylaxis.<sup>1</sup>

Since its initial accreditation in 2005, this course has experienced a high demand. In part, the demand has stemmed from the increased awareness of comprehensive strategies for the management and emergency response to anaphylaxis episodes and also from changes in legislation. The existing course (22099VIC) meets the needs of each of the following legislation and it is anticipated that the re-accredited course will meet these requirements:

- Ministerial Order 706 - Anaphylaxis Management in Victorian Schools
- Children's Services Regulations 2009
- Education and Care Services National Regulations 2011

This course, although aimed at children's services and schools, is used across other industries, such as Aged Care facilities, workplaces etc. Nationally, 165 RTOs have the course on their scope of registration and 125 of these are registered to deliver in Victoria. Although the figures on enrolment are not comprehensive due to the non-mandated reporting of fee-for-service activity to DET, 19 of the RTOs who access VTG funding reported the following trend in enrolments:

2012	1,850
2013	1,800
2014	816

Whilst there is a downward trend in enrolments indicated, there is still a strong demand for the course. There are no Training Package qualifications or units of competency that:

- a) address the first aid response for anaphylaxis as a stand-alone competency
- b) are applicable to all industry settings, and
- c) include associated pre-emergency risk minimisation and management strategies.

A Project Steering Committee was formed to oversee the re-accreditation process and the members were:

Carol Whitehead      Royal Children's Hospital Melbourne

<sup>1</sup> "Anaphylaxis: key messages for health professionals", Victorian Department of Health, [http://www.health.vic.gov.au/chiefhealthofficer/publications/anaphylaxis\\_health\\_professionals.htm](http://www.health.vic.gov.au/chiefhealthofficer/publications/anaphylaxis_health_professionals.htm)

	<p>Prof. Mimi Tang      Royal Children’s Hospital Melbourne  Barbra May      Australian Red Cross  Andrew Fleming      Community Services and Health Industry  Training Board (CS&amp;H ITB)  Stephen McFadyen      The Gordon TAFE  Janelle Savery      St John Ambulance (Victoria)  Phillipa Wilson      Premium Health  Sally Voukelatos      Allergy &amp; Anaphylaxis Australia  Dr Wendy Norton      Allergy &amp; Anaphylaxis Australia  Sally McMillan      Royal District Nursing Service (RDNS)  Education &amp; Learning Centre  Sandra Vale      Australasian Society of Clinical Immunology  and Allergy (ASCI A)  Kate Allwood      Quality Assessment and Regulation Division,  Department of Education and Training (DET)  Steve Passalis      Wellbeing, Health &amp; Engagement Division,  Department of Education and Training (DET)</p> <p><u>In attendance:</u>  Autumn Shea      CMM Human Services, Swinburne University  Jennifer Fleischer      CMM Human Services, Swinburne University  Sam McCurdy      Dewhurst Consultancy Pty Ltd</p> <p>The Steering Committee members reviewed the skills and knowledge of the existing course and confirmed that they were still current for the needs of industry.</p> <p>They also confirmed that the course:</p> <ul style="list-style-type: none"> <li>• does not duplicate, by title or coverage, the outcomes of an endorsed training package qualification</li> <li>• is not a subset of a single training package qualification that could be recognised through one or more statements of attainment or a skill set</li> <li>• does not include units of competency additional to those in a training package qualification that could be recognised through statements of attainment in addition to the qualification</li> <li>• does not comprise of units that duplicate units of competency of a training package qualification.</li> </ul> <p>It is a recommendation that first aid workers demonstrate current competency every 12 months in the following unit of competency:</p> <ul style="list-style-type: none"> <li>• <i>VU21800 Provide first aid management of anaphylaxis</i></li> </ul>
<p><b>3.2. Review for re-accreditation</b></p>	<p>The course has been monitored during its current accreditation period by the CMM-Human Services and the following change was incorporated during this period:</p>

	<ul style="list-style-type: none"> <li>Update to the course in 2014: minor modification to update references to <i>Ministerial Order 706 – Anaphylaxis Management in Victorian Schools</i> (was Ministerial Order 90).</li> </ul> <p>During the mid-cycle review, feedback from RTOs delivering the course largely focused on clarification of some of the wording in the documentation. Other issues raised included the currency of the qualification and need for refresher training, as well as the essential trainer/assessor competencies.</p> <p>This course replaces and is equivalent to the accredited course: 22099VIC Course in First Aid Management for Anaphylaxis.</p> <p>The following transition table indicates the equivalence of the re-accredited course to 22099VIC Course in First Aid Management of Anaphylaxis</p>
--	---

Transition Table 1:

Re-accredited 22300VIC Course in First Aid Management of Anaphylaxis		22099VIC Course in First Aid Management of Anaphylaxis		Comments
Unit code	Unit title	Unit code	Unit title	
VU21800	Provide first aid management of anaphylaxis	VU20296	Provide first aid management of severe allergic reactions and anaphylaxis	Equivalent
VU21801	Develop risk minimisation and risk management strategies for anaphylaxis	VU20297	Develop risk minimisation and management strategies for allergic reaction and anaphylaxis	Equivalent

**4. Course outcomes***Standards 1, 2, 3 and 4 AQTF Standards for Accredited Courses*

<b>4.1. Qualification level</b>	<i>Standards 1, 2 and 3 AQTF Standards for Accredited Courses</i> Although this course meets an identified industry/enterprise or community need, it does not have the breadth, depth or volume of learning of a qualification.
<b>4.2. Employability skills</b>	<i>Standard 4 AQTF Standards for Accredited Courses</i> Not applicable
<b>4.3. Recognition given to the course</b>	<i>Standard 5 AQTF Standards for Accredited Courses</i> Not applicable
<b>4.4. Licensing/regulatory requirements</b>	<i>Standard 5 AQTF Standards for Accredited Courses</i> There are no licensing or regulatory requirements

<b>5. Course rules</b>		<i>Standards 2, 6, 7 and 9 AQTF Standards for Accredited Courses</i>		
<b>5.1. Course structure</b>	<p>Successful attainment of the two units within the course, as listed in Table 2, will result in the issue of a Statement of Attainment for the 22300VIC Course in First Aid Management of Anaphylaxis.</p> <p>A Statement of Attainment will be issued to students who do not complete the full course, listing the unit they have completed.</p>			
<b>Table 2: Course in First Aid Management of Anaphylaxis</b>				
Unit of competency code	Field of Education code	Unit of competency title	Pre-requisite	Nominal hours
VU21800	069907	Provide first aid management of anaphylaxis	None	2
VU21801	069907	Develop risk minimisation and risk management strategies for anaphylaxis	VU21800	2
<b>Total nominal hours</b>				<b>4</b>
<b>5.2. Entry requirements</b>	<p><i>Standard 9 AQTF Standards for Accredited Courses</i></p> <p>As a minimum, entrants to the course must have literacy and numeracy competencies equivalent to the Australian Core Skills Framework Level 2. An example of an ACSF Level 2 competency is being able to read and comprehend the ASCIA Action Plan for Anaphylaxis, request appropriate emergency assistance at the scene of the incident and complete incident reports.</p> <p>In addition, it is recommended that entrants have current competency in Cardio Pulmonary Resuscitation (CPR).</p>			
<b>6. Assessment</b>		<i>Standards 10 and 12 AQTF Standards for Accredited Courses</i>		
<b>6.1. Assessment strategy</b>	<p><i>Standard 10 AQTF Standard for Accredited Courses</i></p> <p>All assessment, including Recognition of Prior Learning (RPL), must be compliant with:</p> <ul style="list-style-type: none"> <li>Standard 1.2 of the <i>AQTF: Essential Conditions and Standards for Initial Registration</i> and Standard 1.5 of the <i>AQTF: Essential Conditions and Standards for Continuing Registration</i>,</li> </ul> <p>or</p>			

	<ul style="list-style-type: none"> <li>• Standard 1, Clauses 1.1 and 1.8 of the <i>Standards for Registered Training Organisations 2015</i> (SRTOs), or</li> <li>• the relevant Standards for Registered Training Organisations in effect at the time of assessment.</li> </ul> <p>RTOs must develop assessment strategies that provide sufficient information to guide assessors and ensure that learners receive assessment that meets their needs and reflects current industry practice. RTOs must therefore:</p> <ul style="list-style-type: none"> <li>• Develop strategies based on consultation with industry stakeholders</li> <li>• Ensure assessment reflects regulations and laws governing the first aid sector</li> <li>• Monitor and improve the effectiveness of assessment strategies based on data gathered from industry stakeholders and learners.</li> </ul> <p>Assessment strategies should be flexible, valid, reliable and fair. Assessment of the unit requires evidence of satisfactory performance being sought for each element and its performance criteria and the required skills and knowledge through a variety of tasks depending on the criteria specified.</p> <p>Where possible, an integrated approach to assessment is recommended. Assessment procedures for this course should be developed to simulate a range of different workplace environments, as closely as possible.</p> <p>Course providers will be required to adopt an assessment strategy that:</p> <ul style="list-style-type: none"> <li>• incorporates continual feedback of individual progress toward, and achievement of competency;</li> <li>• addresses skills, attitudes and knowledge underpinning performance appropriate to the workplace;</li> <li>• gathers sufficient evidence to judge achievement of progress towards determining competence;</li> <li>• utilises a variety of different processes/sources, e.g. written, oral, observation in role-plays, projects;</li> <li>• recognises achievement of elements/competencies regardless of where the enabling learning took place (RPL);</li> <li>• fosters a collaborative and co-operative relationship between the learner and assessor;</li> <li>• is flexible in regard to the range and type of evidence provided by the learner;</li> </ul>
--	---

	<ul style="list-style-type: none"> <li>• provides opportunity for the learner to challenge assessment provisions and participate in re-assessment;</li> <li>• is equitable and fair to all learners;</li> <li>• does not unnecessarily restrict the progress of a learner through the course;</li> <li>• adapts assessment tools to suit the needs of particular clients or client groups (e.g. clients with special needs).</li> </ul> <p>Assessment methods must include the practical application of knowledge and demonstration of skills and may also include:</p> <ul style="list-style-type: none"> <li>• oral or written questioning</li> <li>• problem solving activities</li> <li>• case studies</li> <li>• role play/scenarios</li> </ul>
<p><b>6.2. Assessor competencies</b></p>	<p><i>Standard 12 AQTF Standards for Accredited Courses</i></p> <p>Assessors must have competencies compliant with:</p> <ul style="list-style-type: none"> <li>• Standard 1.4 of the <i>AQTF: Essential Conditions and Standards for Continuing Registration</i>,</li> </ul> <p>or</p> <ul style="list-style-type: none"> <li>• Clauses 1.13, 1.14, 1.15, 1.16 and 1.17 of the <i>Standards for Registered Training Organisations 2015 (SRTOs)</i>,</li> </ul> <p>or</p> <ul style="list-style-type: none"> <li>• the relevant Standards for Registered Training Organisations in effect at the time of assessment.</li> </ul> <p>In addition, it has been determined by industry that assessors must:</p> <ul style="list-style-type: none"> <li>• Have higher level of knowledge and skills than that being assessed, such as nursing/medical, paramedic and/or additional study in the relevant subject area.</li> <li>• Maintain current competence in <i>VU21800 Provide first aid management of anaphylaxis</i> and have these competencies refreshed/reassessed in line with industry requirements.</li> </ul>
<p><b>7. Delivery</b> <span style="float: right;"><i>Standards 11 and 12 AQTF Standards for Accredited Courses</i></span></p>	
<p><b>7.1. Delivery modes</b></p>	<p><i>Standard 11 AQTF Standards for Accredited Courses</i></p> <p>This course may be delivered in a variety of modes including:</p> <ul style="list-style-type: none"> <li>• Classroom delivery</li> <li>• Workplace delivery</li> </ul>

	<ul style="list-style-type: none"> <li>• Flexible delivery</li> </ul> <p>There are no restrictions on offering the program on either a full-time or part-time basis. Where possible, participants should be exposed to real work environments and examples/case studies. It is recommended that the units be delivered in an integrated manner, as some areas of content may be common to more than one element of competency.</p> <p>Strategies should be selected to reflect the nature of the elements and performance criteria and the needs of the participants. An appropriate mix of knowledge and skills development is important.</p>
<p><b>7.2. Resources</b></p>	<p><i>Standard 12 AQTF Standards for Accredited Courses</i></p> <p>The course should be delivered in an environment appropriate to the assessment task that is either on the job or in a simulated workplace environment.</p> <p>When delivered to staff from Victorian Schools, the following resource must be used:</p> <ul style="list-style-type: none"> <li>• <i>Guidelines for Managing Anaphylaxis in all Victorian Schools</i> (developed by Victorian Department of Education and Training)</li> </ul> <p>Other resources required to deliver the course include:</p> <ul style="list-style-type: none"> <li>• Training facilities and equipment</li> <li>• Related range of texts, references and audio/visual material</li> <li>• Australasian Society of Clinical Immunology and Allergy (ASCIA) First Aid Treatment for Anaphylaxis (<a href="http://www.allergy.org.au">http://www.allergy.org.au</a>)</li> <li>• ASCIA Action Plans for Anaphylaxis</li> <li>• Adrenaline autoinjector trainer devices</li> <li>• Communication equipment</li> <li>• Workplace incident/injury reporting documentation</li> <li>• Relevant organisational policies and procedures</li> <li>• Relevant legislative documents</li> </ul> <p>RTOs should ensure that reference material is consistent with:</p> <ul style="list-style-type: none"> <li>• ASCIA information</li> <li>• Australian Resuscitation Council (ARC) Guidelines for provision of first aid.</li> </ul> <p><b>Trainers:</b></p> <p>Trainer competencies must be compliant with:</p> <ul style="list-style-type: none"> <li>• Standard 1.4 of the <i>AQTF: Essential Conditions and</i></li> </ul>

	<p><i>Standards for Continuing Registration,</i></p> <p>or</p> <ul style="list-style-type: none"> <li>• Clauses 1.13, 1.14, 1.15, 1.16 and 1.17 of the <i>Standards for Registered Training Organisations 2015</i> (SRTOs),</li> </ul> <p>or</p> <ul style="list-style-type: none"> <li>• the relevant Standards for Registered Training Organisations in effect at the time of assessment.</li> </ul> <p>In addition, it has been determined by industry that trainers must:</p> <ul style="list-style-type: none"> <li>• Have higher level of knowledge and skills than that being assessed, such as nursing/medical, paramedic and/or additional study in the relevant subject area.</li> <li>• Maintain current competence in <i>VU21800 Provide first aid management of anaphylaxis</i> and have these competencies refreshed/reassessed in line with industry requirements.</li> </ul>
<p><b>8. Pathways and articulation</b></p>	<p><i>Standard 8 AQTF Standards for Accredited Courses</i></p> <p>No formal articulation and credit transfer arrangements have been negotiated with VET RTOs and Universities.</p> <p>Arrangements for credit transfer between VET RTOs and Universities will need to be undertaken individually and on a case-by-case basis.</p> <p>When negotiating articulation arrangements into further studies RTOs should refer to the <a href="#">AQF Second Edition 2013 Pathways Policy</a>.</p>
<p><b>9 Ongoing monitoring and evaluation</b></p>	<p><i>Standard 13 AQTF Standards for Accredited Courses</i></p> <p>This course is maintained and monitored by the Curriculum Maintenance Manager - Human Services.</p> <p>A review of the course will take place at the mid-point of the accreditation period. Feedback will be sought from those Registered Training Organisations offering the course as part of the review process.</p> <p>Processes for gathering evaluation data may include:</p> <ul style="list-style-type: none"> <li>• student feedback questionnaires</li> <li>• client and stakeholder feedback</li> <li>• trainer and assessor feedback</li> <li>• industry changes and updates</li> </ul> <p>Recommendations for any significant changes will be reported to the Victorian Registration and Qualifications Authority (VRQA).</p>

**Section C—Units of competency**

VU21800 Provide first aid management of anaphylaxis 12  
VU21801 Develop risk minimisation and risk management strategies for anaphylaxis 18

<b>VU21800</b>	<b>Provide first aid management of anaphylaxis</b>
<b>Unit Descriptor</b>	<p>This unit describes the outcomes required to provide first aid to a person experiencing anaphylaxis until the arrival of medical assistance. Application of this unit relates to the use of adrenaline autoinjector devices available in Australia.</p> <p>All tasks are to be carried out in accordance with relevant industry legislation and organisational policies.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication</p>
<b>Employability skills</b>	Not applicable
<b>Application of the Unit</b>	This unit can be applied in either the workplace, or in the community.

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the required performance needed to demonstrate achievement of the element. Where italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
1. Confirm an allergic reaction	<p>1.1 <b>Triggers</b> of allergic reactions, including anaphylaxis, are recognised, as stipulated on the individual ASCIA Action Plan for Anaphylaxis</p> <p>1.2 Anaphylactic reactions are distinguished from mild to moderate allergic reactions, as stipulated on the ASCIA Action Plan for Anaphylaxis</p> <p>1.3 <b>Casualty's physical condition</b> is assessed and the signs of severe allergic reaction (anaphylaxis) are identified, in accordance with the ASCIA Action Plan for Anaphylaxis</p>
2. Respond to the situation	<p>2.1 <b>Risks</b> and <b>hazards</b> are identified and removed according to the ARC <b>Basic Life Support flow chart</b> without delaying administration of adrenaline using an adrenaline autoinjector</p> <p>2.2 <b>Required response</b> is determined in accordance with the ASCIA Action Plan for Anaphylaxis, or the ARC Basic Life Support Flowchart</p> <p>2.3 An adrenaline autoinjector is sourced promptly and the <b>necessary checks</b> are conducted on its suitability for use</p>
3. Provide appropriate first aid treatment for anaphylactic reaction	<p>3.1 Casualty is placed in the correct position for treatment, in accordance with the ASCIA Action Plan for Anaphylaxis</p> <p>3.2 Adrenaline is administered using an adrenaline autoinjector correctly and promptly</p> <p>3.3 <b>Emergency action</b> is provided in accordance with the ASCIA</p>

Action Plan for Anaphylaxis and the organisation's emergency response procedures

- 3.4 Casualty's physical condition is monitored in accordance with current first aid principles and the ASCIA Action Plan for Anaphylaxis
4. Communicate details of the incident
  - 4.1 **Emergency assistance** is requested using suitable **communication media or equipment**
  - 4.2 Details of casualty's condition and first aid management activities are accurately conveyed to **emergency services/relieving personnel**, in a manner that recognises that it is time critical
  - 4.3 Incident reporting is completed in a timely manner, presenting all relevant facts according to established procedures
5. Evaluate response to the anaphylaxis incident
  - 5.1 First aid treatment provided in accordance with the organisational emergency response procedures and the casualty's ASCIA Action Plan for Anaphylaxis, is assessed
  - 5.2 First aider's and organisation's responses to the incident, are assessed
  - 5.3 Relevant reports are completed and submitted for consideration of any improvements, as required

## REQUIRED SKILLS AND KNOWLEDGE

*This describes the essential skills and knowledge and their level, required for this unit*

### Skills:

- Reassure the casualty in a caring and calm manner and make them comfortable using available resources
- Apply first aid treatment for mild to moderate allergic reactions and anaphylaxis
- Position the casualty in an appropriate position for treatment, in accordance with the ASCIA Action Plan for Anaphylaxis
- Administer an adrenaline autoinjector correctly and promptly
- Convey casualty's details to emergency services accurately
- Complete incident/injury report forms

### Knowledge:

- The signs and symptoms associated with both mild to moderate allergic reactions and severe allergic reactions(anaphylaxis) and how to distinguish between them
- The triggers/allergens which cause allergic reactions
- First aid principles and procedures, including bringing medication to the casualty rather than moving them (unless it is necessary to remove them from an immediate danger, such as a beehive)
- ARC Basic Life Support Flowchart information

- If there is uncertainty, administer adrenaline as a priority before any other medications (e.g. Asthma reliever medication), as per ASCIA Action Plan for Anaphylaxis
- Anaphylaxis emergency response procedures for the workplace
- Requirements for replacement of the adrenaline autoinjector
- Documentation requirements
- Refresher training requirements for those undertaking this unit

## RANGE STATEMENT

*The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below.*

- Triggers/allergens** may include:
- Foods, most commonly peanuts, tree nuts, egg, cow's milk, wheat, soybean, fish, sesame and shellfish, but any food may be a trigger/allergen
  - Insect stings and tick bites
  - Medications, most commonly antibiotics and anaesthetic agents
  - Exercise
  - Latex

- Casualty's physical condition** may include:
- Mild to moderate signs/symptoms
    - Swelling of face, lips and eyes
    - Hives or welts on the skin
    - Tingling mouth
    - Abdominal pain and vomiting (Which are signs of a mild to moderate allergic reaction to most allergens, however, in insect allergy these are signs of anaphylaxis)
  - Anaphylaxis signs
    - Difficult/noisy breathing
    - Swelling of tongue
    - Swelling/tightness in throat
    - Difficulty talking and/or hoarse voice
    - Wheeze or persistent cough
    - Persistent dizziness or collapse
    - Pale and floppy (young children)

- Risks** may include:
- Risks associated with the trigger of the allergic reaction
  - Worksite equipment, machinery and substances
  - Environmental risks
  - Contamination by bodily fluids
  - Risk of further injury to the casualty

**Hazards** may include:

- Trigger of allergic reaction (e.g. food, bees, ants, medication, latex)
- Workplace hazards
- Environmental hazards
- Proximity of other people
- Hazards associated with casualty management

**Basic Life Support flow chart** includes:

- Danger – ensure area is safe
- Response – check casualty's response
- Send for help
- Airway – open airway
- Breathing – check breathing
- CPR – start CPR and administer until paramedics arrive
- D - Defibrillation

**Required response** includes:

- For mild to moderate allergic reactions:
  - For insect allergy, flick out sting if visible. Do not remove ticks
  - Stay with person and call for help
  - Locate adrenaline autoinjector
  - Give other medications (if prescribed)
  - Phone family/emergency contact
  - Monitor for signs of anaphylaxis
- For anaphylaxis (severe allergic reaction):
  - Lay person flat. Do not allow them to stand or walk. If breathing is difficult allow them to sit
  - Administer adrenaline using an adrenaline autoinjector
  - Phone ambulance
  - Phone family/emergency contact
  - Administer further adrenaline if there is no response after 5 minutes, if another adrenaline autoinjector is available

**Necessary checks** include:

- Drug - It is Adrenaline
- Date - It is not past the use-by date (use if there is no other alternative)
- Appearance of the adrenaline - Use clear rather than discoloured/cloudy (unless there is no other alternative)
- Dose – Epipen Junior (150µg) or Epipen (300µg), as per the ASCIA Action Plan for Anaphylaxis

**Emergency action** involves:

- Lay person flat. Do not allow them to stand or walk. If breathing is difficult allow them to sit
- If casualty is unconscious or vomiting, place them in the recovery position
- Administer adrenaline using an adrenaline autoinjector. If

casualty's adrenaline autoinjector is not available, use a general-use adrenaline autoinjector, if available

- An adrenaline autoinjector for general use can be used on a casualty displaying signs and symptoms of anaphylaxis regardless of whether they have been diagnosed as being at risk of anaphylaxis as per the ASCIA Adrenaline Autoinjectors for General Use - Information for Patients, Consumers and Carers (Factsheet)
- If neither the casualty's adrenaline autoinjector, or a general use adrenaline autoinjector is available, then someone else's adrenaline autoinjector may be used but it must be replaced immediately
- Phone ambulance
- Phone family/emergency contact
- If available, further doses of adrenaline may be given every 5 minutes until arrival of the ambulance if there is no improvement in the casualty's condition

**Emergency assistance** may include:

- Ambulance
- Fire brigade
- Organisation's first aid team

**Communication media or equipment** may include:

- Telephone (Landline, mobile and satellite)
- Two-way radio
- Alarm systems
- Card system for school campuses

**Emergency services/relieving personnel** includes:

- Doctor
- Nurse
- Paramedic
- Ambulance
- First Aider

## EVIDENCE GUIDE

*The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment section in Section B of the accreditation submission.*

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- To be considered competent in this unit the participant must be able to demonstrate the knowledge and skills required to achieve all of the elements of competency to the level defined by the associated performance criteria.
- Specifically they must be able to:
  - Assess the situation taking into consideration the casualty, risks, physical hazards and appropriate response to take

control of the situation using several scenarios

- Administer the treatment (adrenaline autoinjector) for an anaphylactic reaction appropriately. For the purpose of assessment, an autoinjector training device will be used on a mock casualty
- Communicate details of the incident including requesting emergency assistance, conveying details of the casualty to emergency services and producing appropriate documentation according to established procedures
- Evaluate first aid response to the anaphylactic reaction

**Context of and specific resources for assessment**

- Assessment should be conducted in a simulated emergency environment involving the practical demonstration of the application of emergency treatment for anaphylaxis, including:
  - the correct positioning of the casualty
  - administering the adrenaline autoinjector trainer device
- Resources required for assessment include:
  - ASCIA Action Plan for Anaphylaxis
  - Mock casualty simulating an allergic reaction/anaphylaxis
  - Adrenaline autoinjector trainer device

**Method of assessment**

- Assessment must include the demonstration of practical skills in using an adrenaline autoinjector and may also include:
  - Role play
  - Oral presentations
  - Written assignments
  - Structured questions
  - Problem solving scenarios

<b>VU21801</b>	<b>Develop risk minimisation and risk management strategies for anaphylaxis</b>
<b>Unit Descriptor</b>	<p>The unit covers the recognition, risk management, prevention and risk minimisation strategies related to anaphylaxis. It provides the outcomes required to develop and implement a risk management plan to reduce the risk of severe reactions in individuals diagnosed at risk of anaphylaxis.</p> <p>All tasks are to be carried out in accordance with relevant industry legislation and organisational policies.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication</p>
<b>Employability Skills</b>	Not applicable
<b>Prerequisite unit</b>	VU21800 Provide first aid management of anaphylaxis
<b>Application of the unit</b>	This unit can be applied in either the workplace, or in the community.

## ELEMENT

*Elements describe the essential outcomes of a unit of competency.*

## PERFORMANCE CRITERIA

*Performance criteria describe the required performance needed to demonstrate achievement of the element. Where italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.*

- |  |  |
|--|--|
| 1. Develop individual anaphylaxis management plans | <p>1.1 Individuals at risk of mild to moderate allergic reactions and anaphylaxis are identified according to organisational procedures</p> <p>1.2 <b>Medical information</b> is obtained, including an Australasian Society of Clinical Immunology and Allergy (ASCIA) Action Plan for Anaphylaxis, which has been completed and signed by the individual's medical practitioner</p> <p>1.3 <b>Individual anaphylaxis management plan</b> is prepared in consultation with the individual/parent/carer, and distributed to all staff responsible for the individual at risk</p> <p>1.4 Individual anaphylaxis management plan is reviewed at the start of each school year for school-aged children and otherwise annually, in accordance with organisational procedures and the ASCIA guidelines</p> |
|--|--|

- |   |   |
|---|---|
| 2. Implement strategies to prevent allergic reactions, including anaphylaxis                    | <p>2.1 <b>Risk assessment</b> is undertaken for <b>proposed activities</b> in different environments</p> <p>2.2 <b>Strategies</b> are implemented to reduce the risk of an individual's exposure to known triggers/allergens</p> <p>2.3 Effectiveness of risk minimisation strategies are reviewed annually, or after incidents, and feedback is provided to relevant staff</p> <p>2.4 Regular checks are conducted on the adrenaline autoinjector stock to ensure they are not out-of-date, or discoloured</p> |
| 3. Develop a communication plan to raise awareness of allergic reactions, including anaphylaxis | <p>3.1 Relevant <b>stakeholders</b> are identified to facilitate efficient distribution of information</p> <p>3.2 A communication plan is prepared in consultation with all relevant stakeholders, in accordance with the organisation's procedures</p> <p>3.3 <b>Information</b> relevant to the stakeholder cohort is prepared and communicated</p> <p>3.4 The communication plan is reviewed annually to maintain its effectiveness</p>  |

## REQUIRED SKILLS AND KNOWLEDGE

*This describes the essential skills and knowledge and their level, required for this unit.*

### Skills:

- Conduct a risk assessment and rate potential risks
- Work cooperatively with others
- Communicate effectively with a range of stakeholders
- Use high level literacy and numeracy skills as required to read, interpret, address and communicate guidelines, protocols and reporting requirements

### Knowledge:

- The identities of the people at risk, including children
- The triggers/allergens to avoid for mild to moderate reactions and anaphylaxis in individuals
- Understanding of the ASCIA guidelines for treatment of anaphylaxis
- Understanding of the relevant organisational policies and procedures
- Understanding of the relevant industry legislation and policies
- Mild to moderate allergic reactions and anaphylaxis and the potential consequences of the conditions
- Prevention strategies and risk identification and minimisation for people at risk
- The need to have the individual's ASCIA Action Plan for Anaphylaxis reviewed by a

medical practitioner when the adrenaline autoinjector is replaced

- The need to review individual anaphylaxis management plan at the start of each school year for school aged children, and otherwise annually, as per organisational procedures.
- Sources of relevant information and guidelines

## RANGE STATEMENT

*The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below.*

### ***Medical information***

includes:

- ASCIA Action Plan for Anaphylaxis
- Photo identification
- Allergic triggers/allergens
- First aid response, including prescribed medication
- Other medical conditions

### ***Individual Anaphylaxis Management Plan*** must include:

- Individual personal details
- Parent/carer details (depending on age of individual)
- Emergency contact
- Medical information (as above)
- ASCIA Action Plan for Anaphylaxis
- Strategies to avoid allergens/triggers
- Location of the adrenaline autoinjector

### ***Risk assessment*** involves:

- Identification of potential sources of allergens
- Effect of environments on level of risk, e.g. remote camp location exponentially increases risk
- Rating of risks
- Staff skills in the risk management of anaphylaxis

### ***Proposed activities*** may include:

- A range of workplace activities
- Immunisation sessions
- In-school/children's services environments and out-of-school children's services environments, including:
  - Art, craft
  - Cooking
  - Science
  - Incursions
  - Canteens

- Parties/Special event days
- Excursions
- Camps etc.

**Strategies** include:

- Organisational policies
- Staff training
- Management of food related risks
- Management of potential exposure to insect stings/tick bites
- Emergency response procedures for all scenarios
- ASCIA Action Plan for Anaphylaxis
- Sourcing current evidence-based information and guidelines from relevant peak and government bodies (e.g. ASCIA, Allergy & Anaphylaxis Australia, Victorian Department of Education and Training, WorkSafe Victoria)

**Stakeholders** may include:

- Carers/parents
- Workplace first aiders
- Management
- Students
- Teachers
- Nurses
- Casual staff
- Specialist staff
- Early childhood staff
- Food industry staff such as carers, canteen staff
- School camp providers
- Volunteers
- Employers/Employees
- Broader community

**Information** must include

- Identities of people (particularly children and including teenagers) diagnosed at risk of anaphylaxis
- Prevention strategies, risk identification and minimisation for individuals at risk
- Triggers of allergic reactions including anaphylaxis
- Signs/symptoms of allergic reactions, including anaphylaxis
- Roles and responsibilities of individuals in responding to severe allergic reactions
- First aid and emergency response procedures for various scenarios
- Location and correct storage of adrenaline autoinjector devices (including autoinjectors for general use, if applicable)

- Use of adrenaline autoinjector devices
- Policies and procedures of the organisation

## EVIDENCE GUIDE

*The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment section in Section B of the accreditation submission*

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- To be considered competent in this unit the participant must be able to demonstrate the knowledge and skills required to achieve all of the elements of competency to the level defined by the associated performance criteria.
- Specifically they must be able to:
  - Identify individuals at risk of mild to moderate allergic reactions and anaphylaxis
  - Develop individual anaphylaxis management plan according to your organisation's procedures
  - Undertake a risk assessment for a particular environment
  - Develop and implement strategies to reduce risk
  - Communicate with key stakeholders to minimise the risk of exposure to known triggers/allergens

### **Context of and specific resources for assessment**

- Assessment must be conducted in a workplace or in a simulated workplace setting that reflects current workplace structures and systems.
- Resources required for assessment are:
  - ASCIA Action Plan for Anaphylaxis
  - Case studies and scenarios to identify risks
  - Coronial inquest reports to identify risks (optional)

### **Method of assessment**

- For valid and reliable assessment, evidence should be gathered through a range of assessment methods, such as:
  - Observation in the workplace
  - Workplace documentation
  - Oral and written questioning to assess knowledge
  - Case study and scenario analysis
